Alpine Access Has Big Expansion Plans

At least one local firm is still hiring--Denver-based Alpine Access, a provider of outsourced call center services, reported this week that it plans to hire more than 100 home-based employees throughout the state of Minnesota. The firm said it began hiring customer care professionals from the Land of 10,000 Lakes in order to meet demand from new and existing customers. Alpine Access said interested applicants should be self-starters with strong educational backgrounds, previous customer service experience and good online computer skills
